## Design & Production Engineer.

- **Client Focused**
- **Industry Leader**
- **Fantastic Opportunity**

### About Us:

Recognized as a leader across the industrial space, Richmond Wheels and Castors has a fantastic reputation spanning over 60 years in the design, manufacturing, and supply of engineered rolling solutions products. With a solutions and client satisfaction focus, this organization continues to grow year on year. This innovative business provides some of the most advanced products in the market.

### Role:

Based in **Clayton South**, we seek a vibrant, enthusiastic, and knowledgeable **Design & Production Engineer** to assist the engineering department with the day-to-day operations within the engineering office and the factory. This is a role where there is a focus on developing the individual, so they have the skillsets and experience to be utilised in multiple engineering and operational functions that best suits the business with scope for advancement.

### About you:

- Relevant experience in design or production engineering
- Tertiary qualified in Mechanical Engineering or similar.
- Excellent SOLIDWORKS skills.
- Superior knowledge of design for manufacturing and manufacturing processes.
- Sets high standards for personal performance.
- Ability to multitask and manage time.
- Able to perform engineering calculations and material selections.
- Planning and people skills.
- An appetite to jump in and get your hands dirty
- The ability to see projects through from conception to completion
